DuPont Safety & Construction and SkyCell Forge Strategic Alliance in Pharma-Logistics

Companies to share know-how and focus energies in the transportation of temperature-sensitive goods.

WILMINGTON, Del, July 12, 2018 – DuPont Safety & Construction (DuPont), a business unit of DowDuPont Specialty Products Division and the manufacturer of DuPont™ Tyvek® brand thermal cargo covers; and SkyCell, the Swiss-based manufacturer of temperature-controlled containers for food and pharmaceuticals, have announced a formal alliance to collaborate on technical and market development.

Both companies are global leaders in their respective fields and the partnership is expected to lead to transformational innovations in: temperature monitoring, shipment tracking, asset management and 'smart' data-driven services. The combined effort is aimed at maintaining the physical and clinical integrity of pharmaceuticals in transit.

“DuPont is a firm believer in the potential of strategic alliances like this one where each party can leverage its respective strength for powerful solutions,” said Christian Marx, vice president and general manager of Tyvek® and Typar®. “There is a strong strategic fit between DuPont and SkyCell and we see this as an important step in complementing our [Tyvek® Cargo Covers](#) offering and expanding our market capability with high-performance solutions for an increasingly sophisticated pharmaceutical supply chain.”

The alliance will harness the strengths of two of the strongest names in the field of pharmaceutical cold chain to better define and meet the needs of customers around the world. Under the terms of the agreement DuPont will gain access to SkyCell's remote temperature-management solutions and expertise and acquire marketing rights to the SkyCell portfolio of insulated shipping containers. The SkyCell containers will be marketed by DuPont alongside its Tyvek® products enabling the market-leader in cargo covers to provide an unrivalled breadth of high-tech temperature-management solutions to discerning customers. SkyCell, on the other hand, will be in a position to tap into the renowned technical resource of DuPont and will benefit from the DuPont global network especially in emerging markets and the Asia-Pacific region.

“We are excited to be entering into the next stage of our journey by collaborating with DuPont™ Tyvek®, a trusted provider of protection in pharmaceutical logistics,” said Richard Ettl, CEO of SkyCell. “With a shared vision of better leveraging data in the supply chain of

sensitive pharmaceuticals, this partnership will help us play our part in ensuring that medicines, vaccines and other health-related treatments get to the final patients in a safe, sustainable and timely manner.”

For Greater Good™ is the promise of the [DuPont™ Tyvek® brand](#). DuPont™ Tyvek® can provide the trusted protective barrier people need so they can worry less and focus on accomplishing bigger things – making the greater good possible.

About DuPont Safety & Construction

DuPont Safety & Construction, a DowDuPont Specialty Products Division business, is a global leader in products and solutions that protect what matters – people, structures and the environment – and enables its customers to win through unique capabilities, global scale and iconic brands including Corian®, Kevlar®, Nomex®, Tyvek®, Styrofoam™ and Filmtec®.

About DowDuPont Specialty Products Division

DowDuPont Specialty Products, a division of DowDuPont (NYSE: DWDP), is a global innovation leader with technology-based materials, ingredients and solutions that help transform industries and everyday life. Our employees apply diverse science and expertise to help customers advance their best ideas and deliver essential innovations in key markets including electronics, transportation, building and construction, health and wellness, food and worker safety. DowDuPont intends to separate the Specialty Products Division into an independent, publicly traded company. More information can be found www.dow-dupont.com.
